

Phase 5 — bio FM probing summary: scGPT (scRNA, pbmc3k) × HyenaDNA (DNA, promoters)

scGPT × pbmc3k
probe acc vs log1p+PCA-50 baseline

HyenaDNA × genomic_benchmarks
probe acc vs kmer+PCA-50 baseline

SVD spectrum — effective rank per layer

scGPT — ablation gap curves per layer

HyenaDNA — ablation gap curves per layer

Decomposition: drop_PCA (dashed) vs drop_SAE (solid)
for two 'extreme' layers
